Model: F-6075E Tractor

A product which suits all the requirements of complete farming, agriculture, commercial and grounds maintenance works. Powered by Escorts' unique E-CRT (Escorts Common Rail Technology) EPA certified engine with Tier IV technology for cleaner emissions.

3-Cylinder, Powerful and Fuel Efficient Engine

Extra torque engine with Tier 4 emission norms thus creating more power & providing better fuel economy.

Partially Synchromesh Powertrain with F/R Shuttle

Smooth gear shifting and soundless operation, perfectly compatible for all types of operations with 8 Forward+ 8 Reverse speed. F/R shuttle provides quick movement in all directions.

Epicyclic Rear Axle Reduction

Distributed cyclic load on crown wheel & tail pinion which helps in reducing the wear & tear of components and increase the capacity to carry more load.

Independent PTO Clutch

Flat Platform and Side Shift Gear levers

F-6075E TRACTOR

- Farmtrac 6075E with E-CRT technology meets Tier IV Emission Norms = Cleaner emissions and eco-friendly engine
- Synchromesh gear box technology with synchro shuttle = Latest technology for noiseless operations and quick forward/reverse
 - Rear Axles with Epicyclic reduction = Less wear & tear and long components life
- A durable and heavy duty, mechanical front-wheel drive (MFWD) = More traction in tough conditions
 - Flat and integrated platform = More leg space gives better comfort to operator

4 Cylinder Powerful Engine

- More power, less fuel
- More output, with lower operating cost.

12F+12R Speeds with F/R Shuttle

- Multiple speed availability for different applications as per different soil conditions
- Forward/Reverse synchro shuttle for faster movement in F/R direction.

Heavy Lift with ADDC & Smart Lift

- Heavy-duty lifting capacity with Automatic Draft & Depth Control (ADDC) for better sensing.
- 'Smart Lift' feature for quick lifting/lowering of implements during headland turn.

Epicyclic Reduction

- Distributed cyclic load on crown wheel & tail pinion
- Long components life, and less maintenance.

2 SA/DA Valves (Convertible) with Side Operating Lever

- 4 quick release couplers for hydraulic operated implements with side operated lever.
- Operator comfort, improved productivity, saving time with hydraulic operated implements.

Tiltable Steering with Cluster

- Operators can adjust the steering wheel according to their comfort for better visibility.
- Less fatigue, more operator comfort.

Semi-automatic Hitch with Quick Attach TPL (optional)

- Easy to operate and best-in-class
- Less fatigue, more operator comfort
